

## **RoadMap for Mapula Pertunia Hanyane Portfolio**

### ❖ Week 1

03/02/2020

- Week one we were given a project and time when its due.
- I started learning mock flow and started planning on the papers.
- I started with the design of the website using mock flow which guided me on how the webs pages are going to look .
- I started with the design of the web pages on the visual studio by friday on 07th/02/2020.

### ❖ Week 2

10th/02/2020

- 
- I continued coding using a visual studio and language was html.
- I added 5 sections in one html page.My sections home,about me,skills,services and get in touch.
- I coded all the styling under one css .
- I used javascript for functions ,which links my contact form to my email when a user visits my page and wants to get in touch, in order for this to work i used firebase where i created a database where a users name ,surname ,email and message are going to be kept as a record , and also send to my email.
- I also included the Mzamomtsha project that we did as part of accomplishment.
- I uploaded my work to Gidhub to keep records of my work.
- I uploaded my final project on netfliy.com on friday 14th/02/2020
